    public string AgencyCode { get; set; }
```

```csharp
        public string FacultyCode { get; set; }
        public string ProgramCode { get; set; }
        public string SessionID { get; set; }
        public Nullable<System.DateTime> StartDate { get; set; }
        public Nullable<System.DateTime> EndDate { get; set; }
        public Nullable<int> Duration { get; set; }
        public string MSPIN { get; set; }
        public string Name { get; set; }
        public Nullable<System.DateTime> DateofBirth { get; set; }
        public string MobileNo { get; set; }
        public Nullable<bool> IsAccepted { get; set; }
        public Nullable<System.DateTime> CreationDate { get; set; }
        public Nullable<System.DateTime> ModifiedDate { get; set; }
        public Nullable<int> CreatedBy { get; set; }
        public Nullable<int> ModifiedBy { get; set; }
    }
```

Update Nomination List

- API – api/RtcMaster/UpdateMultiNominationList
- Parameter Type: List (which is received in Detail API)
- Business model:

```csharp
        public class MultiNominationList
        {
            public int Id { get; set; }
            public string Co_id { get; set; }
            public string Region { get; set; }
            public string Venue { get; set; }
            public string Dealer_LocationCode { get; set; }
            public string DealerName { get; set; }
            public string City { get; set; }
            public string Location { get; set; }
            public string AgencyCode { get; set; }
            public string FacultyCode { get; set; }
            public string ProgramCode { get; set; }
            public string SessionID { get; set; }
            public Nullable<System.DateTime> StartDate { get; set; }
            public Nullable<System.DateTime> EndDate { get; set; }
            public Nullable<int> Duration { get; set; }
            public string MSPIN { get; set; }
            public string Name { get; set; }
            public Nullable<System.DateTime> DateofBirth { get; set; }
            public string MobileNo { get; set; }
            public Nullable<bool> IsAccepted { get; set; }
            public Nullable<System.DateTime> CreationDate { get; set; }
            public Nullable<System.DateTime> ModifiedDate { get; set; }
```

```
        public Nullable<int> CreatedBy { get; set; }
        public Nullable<int> ModifiedBy { get; set; }
    }
```

- Return Type: string (i.e. -"Success: Updated Successfully")
